## Shop-Proven Premium-Grade Polish For The Professional

The answer to a gun polisher's dream! Made to the highest standards of quality with carefully screened, true-sized grits for reliable, repeatable results and a natural, greaseless base that doesn't leave a residue to mess up bluing or plating jobs. Packed in a formed, flexible plastic tube to stay fresh between uses. 1) Unlike hard drying abrasives, Polish- O-Ray® sets up to a medium soft surface without flinty hard flakes which, regardless of grit size being used, can do serious damage to a polished surface. 2) It is easily applied to polishing wheels without stopping the motor. Simply press the open end of the tube to your wheel; the polish adheres to the moving surface, hardens in a few seconds and is ready for use. 3) Because of its softer nature, a true, ripple-free surface is quickly obtained on all wheels. The best possible polished surface, free from ripples and bounce marks, is your assurance of a superior, professional refinishing job. Polish-O-Ray® does this for you. 4) Polish-O-Ray® has been used by gunsmiths, metal finishers, and aircraft manufacturers since the early 1940's. Wherever a quality surface, free from chatter marks, scratch marks and imperfections is required, the use of Polish-O-Ray® is a MUST. One precision manufacturer in the southeast orders by the keg. And, where else but on a gun does a perfect finish draw more praise and admiration? These beautiful finishes are the reason for Polish-O-Ray®'s continuing popularity among our country's gunsmiths and serious hobbyists. By following the "Master Metal Polisher's" technique, it is possible to obtain a top quality finishing job in a minimum of time with P-O-R®. Complete instructions are in our Bluing Instruction Booklet (#076-200-135) and the book Gunsmith Kinks™. It consists; mainly, of starting with the coarsest grit and polishing the surface in one direction; then, with the next finer grit on a different wheel polishing at 45° angles to the first "pass". By following this procedure down through the finer grit numbers, the final surface is unequalled for quality and perfection. Polish-O-Ray® is shipped in a resealable outer bag. Put the tube back in the bag, seal with a twist tie and ALWAYS store all your Polish-O-Ray® - brand new or partially used - in the refrigerator for longest life.

# PolishORay® 400 Grit PolishORay Safety Instruction Guide

## Introduction

Thank you for choosing PolishORay® 400 Grit PolishORay. This product is designed to provide exceptional polishing results for gunsmiths, metal finishers, and hobbyists. To ensure safe usage and compliance with the EU General Product Safety Regulation (GPSR), please read this safety instruction guide carefully.

## General Safety Guidelines

- Ensure that the product is kept out of reach of children and vulnerable individuals.
- Always use the product in a wellventilated area to avoid inhalation of dust or particles.
- Wear appropriate personal protective equipment (PPE) such as gloves, safety goggles, and a dust mask while using the product.
- Inspect the product packaging for any damage before use. Do not use if the packaging is compromised.
- Regularly check for updates regarding product recalls on the EU's Safety Gate platform.

## Specific Safety Precautions for Use

### • Hazard Identification:

- The product may produce fine dust particles during use, which can be harmful if inhaled.
- Contact with skin may cause irritation; use gloves to minimize contact.
- The polish may harden quickly upon contact with surfaces, so ensure proper application to avoid mishaps.

### • Avoiding Hazards:

- Always apply PolishORay® while the polishing wheel is in motion to ensure even distribution.
- Do not stop the motor while applying the polish.
- Ensure that the work area is clean and free from clutter to prevent accidents.
- Never use the product near open flames or sources of ignition.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary equipment, including polishing wheels and personal protective equipment (PPE).
- Ensure the polishing machine is set up correctly and is functioning properly.

### 2. Application:

- Remove the cap from the PolishORay® tube.
- Press the open end of the tube against the polishing wheel while it is in motion.
- Allow the polish to adhere to the wheel; it will harden within a few seconds.
- Continue polishing the surface in a consistent direction to achieve the best results.

### 3. Technique:

- Start with the coarsest grit and polish the surface in one direction.
- Switch to a finer grit on a different wheel, polishing at 45° angles to the first pass.

- Repeat this process with progressively finer grits to achieve a highquality finish.

#### **4. PostApplication:**

- After use, clean the polishing wheel to remove any residual polish.
- Store the PolishORay® tube back in the resealable outer bag and seal with a twist tie.
- For optimal longevity, store the product in the refrigerator.

## **Disposal Instructions**

- Dispose of any unused product and packaging in accordance with local regulations.
- Do not dispose of the product in household waste. Check for special disposal instructions or recycling options in your area.

## **Contact Information for Further Support**

For any inquiries related to product safety or usage, please contact the manufacturer or consult the product documentation.

Thank you for prioritizing safety while using PolishORay® 400 Grit PolishORay. Your adherence to these guidelines helps ensure a safe and effective polishing experience.
