

# ACRAGLAS RELEASE AGENT - BROWNELLS ACRAGLAS NON-FLAMMABLE RELEASE AGENT, 1 QUART

[Gunsmith Tools](#) > [Stock Work & Finishing](#) > [Stock Bedding Accessories](#) > [Mold Releases](#)

Our traditional Release Agent and our new, easy-to-ship, Non-Flammable Release Agent selectively lets Acraglas bond to the stock but not to the barreled action. Both products present nearly identical physical characteristics, and are applied in exactly the same manner with no noticeable difference in dry time. Both form a smooth, vinyl-like coating between the bedding compound and metal. Non-Flammable Release Agent is a non-flammable, non-hazardous formula that can be transported by air, immediately upon request, safely and legally within and outside the Continental U. S., so there's no more waiting for ground shipments to arrive when you need an Acraglas kit or extra release agent in a hurry.

# ACRAGLAS RELEASE AGENT SAFETY INSTRUCTIONS

## Introduction

Thank you for choosing the ACRAGLAS RELEASE AGENT by Brownells. This product is designed to provide a reliable release agent for your Acraglas applications. To ensure your safety and the effective use of this product, please read and follow the safety instructions outlined in this guide.

## General Safety Guidelines

- Always ensure proper ventilation when using this product.
- Keep the product out of reach of children and pets.
- Use personal protective equipment (PPE) such as gloves and goggles when handling the release agent.
- Avoid direct contact with skin and eyes. In case of contact, rinse immediately with plenty of water.
- Do not ingest the product. If swallowed, seek medical attention immediately.
- Store the product in a cool, dry place away from heat sources and direct sunlight.
- Follow local regulations for disposal of chemical products.

## Specific Safety Precautions for Use

- Ensure that the workspace is wellventilated to minimize inhalation of fumes.
- Avoid using the product near open flames or sparks as it is a nonflammable formula but can still emit vapors.
- Do not mix with other chemicals unless specified in the product instructions.
- Always read and follow the instructions on the product label before use.
- If you experience any adverse reactions such as dizziness, headaches, or respiratory issues, discontinue use and seek fresh air.

## Instructions for Installation and Usage

### 1. Preparation

- Ensure that the surface to be treated is clean and dry.
- Shake the bottle of ACRAGLAS RELEASE AGENT well before use.

### 2. Application

- Apply a thin, even coat of the release agent to the stock area where Acraglas will bond.
- Avoid overapplication to prevent excess buildup.

### 3. Curing

- Allow the release agent to dry completely before proceeding with the Acraglas application.
- There is no noticeable difference in dry time between the traditional and nonflammable release agents.

### 4. CleanUp

- Clean any spills immediately with a suitable cleaning agent.
- Dispose of any used materials in accordance with local regulations.

## **Disposal Instructions**

- Dispose of the product and its container in accordance with local environmental regulations.
- Do not pour the product down the drain or dispose of it in regular household waste.
- Check for any local collection points for hazardous waste disposal.

## **Contact Information for Further Support**

For any questions or concerns regarding the use of ACRAGLAS RELEASE AGENT, please contact your local distributor or refer to the product label for further support options.

This product complies with the EU General Product Safety Regulation (GPSR). Please stay informed about safety updates and product recalls by checking the EU's Safety Gate platform.

Thank you for your attention to safety while using the ACRAGLAS RELEASE AGENT.
