

PRODUCTION POT IV - LEE PRECISION LEE PRODUCTION POT IV 110V

[Reloading](#) > [Bullet Casting](#) > [Casting Furnaces & Accessories](#)

Large, deep pot holds approximately 10 pounds of lead. Melt time is less than 20 minutes. Pour spout up front where it belongs so you can see what you're doing. Infinite heat control. Uses only 500 watts of power during heat-up and a lot less to maintain temperature. Large, stable base for safety. 4" of clearance under the spout is high enough to accept all brands of bullet molds and most sinker molds. Melter is capable of reaching 900 degrees Fahrenheit.

Attributes

- Name: [LEE PRECISION LEE PRODUCTION POT IV 110V](#)
- Manufacturer: [LEE PRECISION](#)
- Product no.: 100010155
- Mfr. No.: 90009
- Delivery weight: 1.588kg
- Shipping height: 175mm
- Shipping width: 198mm
- Shipping length: 279mm
- UPC: 734307900090

Safety Instruction Guide for PRODUCTION POT IV

LEE PRECISION

Introduction

Thank you for choosing the PRODUCTION POT IV by LEE PRECISION. This guide provides essential safety instructions and guidelines for the safe use of your new casting furnace. Please read this guide thoroughly before use to ensure a safe and efficient experience.

General Safety Guidelines

- Always prioritize safety when using the PRODUCTION POT IV.
- Ensure that the product is used in accordance with the instructions provided in this guide.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for any updates or recalls regarding the product on the EU's Safety Gate platform.
- Report any unsafe products or incidents to local authorities.

Specific Safety Precautions for Use

- Do not exceed the maximum lead capacity of 10 pounds.
- Ensure the pot is placed on a stable and heatresistant surface to prevent tipping or accidents.
- Keep flammable materials away from the working area.
- Always wear appropriate personal protective equipment (PPE), including heatresistant gloves and safety goggles.
- Never leave the pot unattended while in use.
- Allow the pot to cool down completely before handling or cleaning.
- Be cautious of the high temperatures; the melter can reach up to 900 degrees Fahrenheit.
- Ensure proper ventilation in the area where the pot is used to avoid inhaling harmful fumes.
- Use the pour spout carefully to prevent spills or splashes of molten lead.

Instructions for Installation and Usage

1. Installation:

- Place the PRODUCTION POT IV on a flat, stable surface that can withstand high temperatures.
- Ensure that there is sufficient clearance under the spout (at least 4 inches) to accommodate all brands of bullet molds and most sinker molds.
- Plug the unit into a power outlet that meets the specified voltage (110V).

2. Usage:

- Turn on the unit and set the desired temperature using the infinite heat control.
- Allow the pot to heat up for approximately 20 minutes until the lead is fully melted.
- When pouring, position the pot securely and use the pour spout to direct the molten lead where needed.
- After use, turn off the pot and unplug it from the power source.
- Follow the cooling instructions and wait for the pot to cool down completely before cleaning.

Disposal Instructions

- Dispose of any unused lead and waste materials in accordance with local regulations.
- Do not dispose of lead in regular household waste. Check for designated disposal facilities in your area.
- Ensure that all components of the PRODUCTION POT IV are disposed of responsibly, following

environmental guidelines.

Contact Information for Further Support

For any questions or concerns regarding the PRODUCTION POT IV, please consult the manufacturer's website or contact your local distributor for assistance. Ensure you have the product details ready for a more efficient support experience.

Thank you for prioritizing safety while using the PRODUCTION POT IV. Your attention to these guidelines helps ensure a safe and enjoyable casting experience.
