### An Extended Mag Release Built for the Glock G43X and G48

TYRANT CNC GLOCK® 43X/48 EXTENDED MAGAZINE RELEASES Some of the most recent introductions in the Glock® lineup are the Glock® G43X and the G48, which feature an enhanced, stagger-stack magazine construction to cram more rounds into a slim grip than ever before. However, even with the extended capacity, it's still critical to get your empty or malfunctioning mags clear of the gun when needed, and that's where the Tyrant Designs Extended Magazine Release comes in. Each Tyrant Designs Extended Magazine Release for the Glock® G43X/G48 is machined from aerospace-grade aluminum and is designed to blend easily with the contours and ergonomics of the Glock® platform. The enhanced design brings all of the reliable functioning of the OEM release, along with a few added extras designed to give you the edge in a fight. The Tyrant Designs Extended Magazine Release features raised, chamfered edges that allow the release to be activated positively in a fight. To further enhance engagement of the release, the surface of the unit features a chevron pattern that adds texture for definitive engagement. No tools are necessary for installation. NOTE: Manufacturer Warrantee does not cover use with metal magazines.
