

# BACKUP IRON SIGHT FOR GLOCK G43X/G48 - FORWARD CONTROLS DESIGN GLOCK G43X/G48 BACKUP IRON SIGHT WITH NO TRITIUM

[Handgun Parts](#) > [Sights](#) > [Sight Sets](#)

BIS, G43X/48 (Backup Iron Sight, G43X/G48) is a collaboration between Ameriglo and FCD. Specifically made for Glock G43X and G48, these sights are based on the superb Ameriglo GL-527 with a front sight height of 0.450", and a rear sight height of 0.554", this sight sets provide lower 1/3 co-witness with the Trijicon RMRcc when used with our OPF-G43X/43, RMRcc on G43X and G48. BIS, G43X/48 consists of the following: Front sight, available with either green Tritium and white outline (no serrations), or serrated front sight, no tritium or white outline. Rear sight, serrated. BIS, G43X/48 is slightly different from GL-527 on which it's based. These FCD particular changes are: Tritium option for the front sight. Front sight back strap angle is steeper (25 degrees on the serrated, non-tritium front sight, 20 degrees on non-serrated, tritium front sight) to mitigate snagging when the pistol is drawn from and out of the holster where it's likely to encounter clothing, and the front sight's top corners are softened. Rear sight is horizontally serrated. Designed and made in the USA. Special thanks to the professionals at Ameriglo <https://ameriglo.com/> that made this project possible, Forward Controls Design are grateful for their willingness to work with a small outfit for shared customers / users. G43X/49 with RMRcc is approved by many agencies, most of which require red dot pistols be equipped with metallic, co-witnessing backup sights for both on and off duty use. BIS, G43X/48 was created with them in mind. NOTE: if you don't have a sight pusher or the equipment to install rear sights, please bring it to a qualified and competent gunsmith to perform the installation. It's not uncommon to have to fit the rear sight to the dovetail, a competent gunsmith should be well familiar with the reason and method. Forward Controls Design have seen more than enough expensive muzzle devices ruined by "gunsmiths" that used a screw driver to install them instead of a torque wrench, and hand tightened optics plate screws when a torque value is clearly noted in multiple places. Rather than being loose (easy to install), Forward Controls Design prefer the sights be tight, so it won't be knocked off zero easily. Tolerances of the dovetail and sights also come into play, which results in some being easier, while others are harder to install. A qualified gunsmith can deal with these easily.

## Attributes

- Name: [FORWARD CONTROLS DESIGN GLOCK G43X/G48 BACKUP IRON SIGHT WITH NO TRITIUM](#)
- Manufacturer: [FORWARD CONTROLS DESIGN](#)
- Product no.: 430103595

# Safety Instruction Guide for BACKUP IRON SIGHT FOR GLOCK G43X/G48

## Introduction

Thank you for choosing the BACKUP IRON SIGHT FOR GLOCK G43X/G48 by Forward Controls Design. This guide provides important safety information, installation instructions, and usage guidelines to ensure the safe and effective use of your product. Please read this manual carefully before installation and use.

## General Safety Guidelines

- Ensure you are familiar with the operation of your Glock G43X or G48 before using the backup iron sight.
- Always treat firearms as if they are loaded. Follow all standard firearm safety rules.
- Keep the product out of reach of children and unauthorized users.
- Inspect the iron sight regularly for any signs of wear or damage.
- If you notice any defects or irregularities, discontinue use immediately and consult a qualified gunsmith.
- Follow all local laws and regulations regarding firearm accessories and modifications.

## Specific Safety Precautions for Use

- The backup iron sight is designed for use with Glock G43X and G48 models only. Do not attempt to use it with other firearms.
- Ensure the sight is securely installed before using the firearm.
- Be aware of your surroundings and ensure a safe backdrop when using your firearm.
- Avoid using the sight in conditions that may impair your vision, such as low light or heavy rain, unless you are using appropriate optics.
- Do not attempt to modify the iron sight or its components. Any modifications may compromise safety and functionality.

## Instructions for Installation and Usage

### 1. Installation Instructions:

- Gather all necessary tools, including a sight pusher or appropriate installation equipment.
- If you lack the necessary tools or expertise, seek assistance from a qualified gunsmith.
- Remove the existing rear sight from your Glock G43X or G48 using the appropriate tools.
- Carefully install the rear sight into the dovetail, ensuring it is properly aligned. A qualified gunsmith can assist with fitting if necessary.
- Install the front sight according to the manufacturer's specifications, ensuring it is securely fastened.
- Check that both sights are properly aligned and tightened before use.

### 2. Usage Instructions:

- Familiarize yourself with the sighting system and practice using it in a safe environment.
- Regularly check the tightness of the sights and ensure they remain securely in place during use.
- Maintain your firearm and sights according to the manufacturer's recommendations for optimal performance.

## Disposal Instructions

- Dispose of any old or damaged sights and components in accordance with local regulations for electronic waste and firearm accessories.

- Do not dispose of sights in regular household waste. Check with local authorities for proper disposal methods.

## **Contact Information for Further Support**

For any questions or concerns regarding the BACKUP IRON SIGHT FOR GLOCK G43X/G48, please consult a qualified gunsmith or contact the manufacturer directly.

By following these guidelines, you can ensure the safe use of your BACKUP IRON SIGHT FOR GLOCK G43X/G48 and enhance your shooting experience. Thank you for your attention to safety.
