OTB Placard 5.56 x 45 Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The LV Placard was designed to give users superior retention of magazines and other mission critical equipment. The usage of elastic creates form fitting cells that can hold a variety different items. The stretchy nature of elastic allows it to expand to accommodate large or oddly shaped pieces of equipment. Unlike other elastic pouches on the market, we utilize webbing at the base of the system instead of sewing it completely shut. This allows for maximum flex and articulation and assists in eliminating the "birthing" effect (this is where items begin to be pushed out of the pouch because the elastic tapers at the bottom). Spiritus Systems has also added laminate loops on the outside of each cell to allow for the attachment of retention loops or to allow you to pull the pouch open to insert items more easily. The back of the placard is fully lined with hard loop velcro for a secure fitment to your plate carrier. The OTB 5.56 Placard differs from the standard placard in that it has a webbing strap that has velcro and a snap added to it. This webbing strap snaps into the OTB O V E R T Front Plate Bag and the Velcro tucks inside the plate bag to keep the placard more secure when jumping into water. NOTE: This is a component of a Spiritus Systems OTB (Over The Beach) LV/119 Plate Carrier build. To build the COMPLETE plate carrier that this placard is compatible with, you will need to select AT LEAST ONE of each of these items: Spiritus Systems OTB Front Plate Bag Spiritus Systems OTB Rear Plate Bag Spiritus Systems OTB Tri Fold Shoulder Covers Spiritus Systems Cummerbund Set
