[Rifle Parts](#) > [Build Kits](#) > [Handguards & Rails](#)

Breek Arms mission is to provide quality parts at competitive prices. Our newly developed RG2-S (Rigid Rail Mod2 Skeletonized) Handguard line up is an evolution from our previous lineup. Our Patent Pending locking mechanism uses a wedge block system that puts equal pressure all the way around the barrel nut. This gives better harmonics and a much stronger mounting solution especially when putting pressure on the end using a bipod or sling. The Newly Released RG2-S handguards were developed with suppressor builds in mind, each length is designed to fit a common barrel length and leave room for all types of quick attach suppressor mounting solutions. The skeletonized design shaves as much weight as possible without sacrificing the integrity of the handguard. All edges are chamfered, blasted, then Type 3 Hardcoat anodized for a smooth finish.
