The 2BO-S Single Port Muzzle brake was designed to reduce recoil and muzzle rise and keep your rifle footprint short. The recoil reduction allows the shooter to stay on target and take follow up shots quickly. This is important when speed and accuracy make the difference such as in competitive shooting or self defense situations. The brake is machined out of 4140 steel, heat treated for hardness, and nitride offering exceptional strength and durability. The 2BO-S has a large 90 degree port to mitigate recoil and muzzle rise countering the force generated through firing. This gives less blowback resulting in higher overall shooter comfort. It features a sleek design that integrates seamlessly with any system, maintaining a clean appearance that looks great on any firearm. Safety Instruction Guide for 2BOS Short Muzzle Brake

Introduction

Thank you for choosing the 2BOS Single Port Muzzle Brake by BREEK ARMS. This product is designed to enhance your shooting experience by reducing recoil and muzzle rise. It is important to follow all safety instructions and guidelines to ensure safe and effective use.

General Safety Guidelines

- Always treat every firearm as if it is loaded.
- Ensure the muzzle brake is properly installed before use.
- Keep the muzzle pointed in a safe direction at all times.
- Wear appropriate eye and ear protection while shooting.
- Store the muzzle brake and firearm in a secure location, out of reach of children and unauthorized users.
- Regularly inspect the muzzle brake for any signs of wear or damage before each use.
- Follow all local laws and regulations regarding firearm accessories.

Specific Safety Precautions for Use

- Do not exceed the recommended caliber specifications for the muzzle brake.
- Only use the muzzle brake with compatible firearms.
- Ensure that the muzzle brake is securely fastened to the firearm before shooting.
- Avoid using the muzzle brake in adverse weather conditions that may affect performance.
- Be aware of your surroundings and ensure a safe shooting environment.
- If you experience any unusual sounds or performance issues while using the muzzle brake, stop using it immediately and consult a qualified gunsmith.

Instructions for Installation and Usage

Installation

1. **Tools Required:** You will need a wrench to install the muzzle brake.
2. **Remove Existing Muzzle Device:** If applicable, unscrew and remove any existing muzzle device from your firearm.
3. **Install the Muzzle Brake:**
 - Align the threads of the muzzle brake with the threads of the firearm's muzzle.
 - Handtighten the muzzle brake onto the threads.
 - Use the wrench to securely tighten the muzzle brake, ensuring it is snug but not overtightened.
4. **Install Crush Washer:** Place the provided crush washer between the muzzle brake and the firearm to ensure a proper fit.
5. **Final Check:** Ensure that the muzzle brake is securely attached and that there is no wobble or movement.

Usage

- Before each use, check that the muzzle brake is securely attached.
- Load your firearm according to its manufacturer's instructions.
- Position yourself comfortably and ensure a stable shooting stance.
- Aim at your target and ensure the area is clear of obstructions and people.
- Fire your firearm following safe shooting practices.
- After shooting, inspect the muzzle brake for any signs of damage or excessive wear.

Disposal Instructions

- Dispose of the muzzle brake in accordance with local regulations.
- If the muzzle brake is damaged or no longer usable, contact your local waste management facility for proper disposal methods.
- Do not dispose of the muzzle brake in regular household waste.
