

## AR-15/M16 MOE RL CARBINE STOCK - MAGPUL MOE RL COLLAPSIBLE MIL-SPEC CARBINE STOCK FOR AR-15 FDE

[Rifle Parts](#) > [Stock Parts](#) > [Buttstocks](#)

The MOE RL (Reversed Lever) Carbine Stock is a streamlined, A-frame design that replaces OEM stocks and provides clean aesthetics and ease of use. The easily accessible, unobtrusive, reversed adjustment lever is inset into the front of the stock, allowing the stock's length of pull to be adjusted in overall length from 10.65" to 13.85". The stock also offers a slightly increased cheek-weld area for enhanced shooter comfort. Combining these two aspects of the MOE RL Carbine stock allows shooters to adjust the LOP on the fly if necessary while maintaining a positive check weld; this keeps the shooter locked into the gun and promotes continued situational awareness. To further increase shooter comfort, the MOE RL Stock is compatible with the SL Enhanced Rubber Butt-Pad so shooters can use the recoil pad that best fits their circumstances. For sling attachment, the RL includes an ambidextrous M-LOK slot in the rear of the stock that functions as a footman's loop or a space to attach an M-LOK QD Sling Mount. Made in the USA. Streamlined adjustment lever Permits LOP adjustment without breaking the shooter's cheek weld Classic A-frame style Provides rigid structure for strength Improved Cheek Weld Slightly increased surface area for improved cheek weld Adaptable and configurable to various shooting scenarios Adjustable LOP (10.65" to 13.85") For sling attachment, includes an M-LOK slot that acts as footman's loop or a space for an M-LOK QD Sling Mount Accepts both SL extended butt-pads and DT Carbine stock butt-pads Platform: AR10, AR15, M4, M16, M110, SR25 Compatibility: Will not interfere with single-point slings attached to ASAP or ASAP QD receiver end plates. Mil-Spec sized carbine receiver extension tube (not included) from manufacturers such as Colt, LMT, Ruger, S&W, SIG, and others\*

\*Specifications based on standard-length (flat-back) M4 Carbine receiver extension and may vary depending on tube manufacturer. NOTE: There are two basic sizes of M4 Carbine receiver extensions (buffer tubes): Mil-Spec and Commercial-Spec. The DT Carbine Stock will only fit with the common Mil-Spec tube.

# Safety Instruction Guide for AR15/M16 MOE RL Carbine Stock

## Introduction

Thank you for choosing the AR15/M16 MOE RL Carbine Stock by Magpul. This product is designed to enhance your shooting experience while ensuring safety during use. Please read this safety instruction guide carefully to understand how to use the product safely and effectively.

## General Safety Guidelines

- Always treat the firearm as if it is loaded.
- Ensure that the firearm is pointed in a safe direction at all times.
- Keep your finger off the trigger until you are ready to shoot.
- Be aware of your surroundings and ensure that you have a clear line of sight.
- Regularly inspect the stock and firearm for any signs of wear or damage.
- Follow all local laws and regulations regarding firearm usage and storage.
- Store the firearm securely and out of reach of children or unauthorized users.

## Specific Safety Precautions for Use

- **Compatibility:** Ensure that the MOE RL Carbine Stock is compatible with your specific firearm model (AR15, M4, M16, etc.) before installation.
- **Installation:** Follow the installation instructions carefully to avoid improper fitting, which could lead to malfunction.
- **Adjustments:** Only adjust the length of pull when the firearm is in a safe position and not loaded.
- **Sling Attachment:** Ensure that any sling attachments are secure to prevent accidental detachment during use.
- **Cheek Weld:** Maintain a proper cheek weld to ensure accuracy and control while shooting.
- **Shooting Environment:** Be mindful of the shooting environment and adjust the stock for comfort and stability based on conditions.

## Instructions for Installation and Usage

### 1. Installation:

- Remove the existing stock from your firearm by loosening the receiver extension tube.
- Align the MOE RL Carbine Stock with the receiver extension tube.
- Securely tighten the stock onto the tube, ensuring it is properly fitted.
- Confirm that the stock is stable and does not wobble.

### 2. Adjusting Length of Pull:

- Locate the reversed adjustment lever on the front of the stock.
- Pull the lever to release the stock lock.
- Slide the stock to the desired length of pull (10.65" to 13.85").
- Release the lever to lock the stock in place, ensuring it is secure.

### 3. Sling Attachment:

- Identify the ambidextrous MLOK slot located at the rear of the stock.
- Attach your sling mount or footman's loop as required.
- Ensure that all attachments are secure before use.

#### **4. Usage:**

- Maintain a proper stance and grip on the firearm.
- Adjust the stock for comfort and stability as needed during shooting.
- Regularly check the stock and attachments during use for any signs of wear.

## **Disposal Instructions**

- Dispose of the product in accordance with local regulations regarding the disposal of polymer materials.
- Do not dispose of the product in household waste.
- Consider recycling options where available.

## **Contact Information for Further Support**

For any safety inquiries or concerns regarding the AR15/M16 MOE RL Carbine Stock, please refer to the manufacturer's website or contact their customer service for assistance. Always ensure you have the most current information regarding safety and usage guidelines.

Thank you for prioritizing safety while using the AR15/M16 MOE RL Carbine Stock. Your adherence to these guidelines will help ensure a safe and enjoyable shooting experience.
