

# RIFLE PRO DIE PACKS - LYMAN PRO DIE PACK, 8.6 BLACKOUT STAINLESS STEEL

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Lyman Pro dies will set a new standard for reloading die performance! Designed for the tremendous volume of our Mark 7 presses, every aspect of these precision dies was carefully engineered for top performance. Of course, they work great in regular progressive presses as well as turret and single station presses. Our first consideration was the material of the dies. Our size, seat and crimp dies are all made of stainless steel which was chosen for its toughness and anti-corrosion qualities. No more rusted dies! Lyman's sizing dies are equipped with highly polished carbide rings for the ultimate in wear resistance and reduced sizing force. In addition, the sizing dies are equipped with a springloaded decapping rod system to ensure that the primer is forcefully ejected from the primer pocket. Lyman's rifle sets get their famous M die neck expander, with its famous two step expander plug for just the right amount of neck tension and case mouth flare. The pistol sets include their flare die which are designed to allow bullets to properly sit on the case mouth prior to seating. Next is their Micrometer Seating die. This seating die has a micrometer adjustable seating head for precision bullet seating length. Its floating bullet seating punch centers the bullet on the case and eliminates excessive run-out. Finally, each set is equipped with a taper crimp die (micrometer adjustable) to fully remove any case mouth flare and to provide improved bullet retention. Lyman Pro dies offer more features at a better price than any competitive dies available!

## Attributes

- Name: [LYMAN PRO DIE PACK, 8.6 BLACKOUT STAINLESS STEEL](#)
- Manufacturer: [LYMAN](#)
- Product no.: 430110526
- Mfr. No.: 7701056
- Cartridge: 8.6 Blackout
- Delivery weight: 1.361kg
- Shipping height: 51mm
- Shipping width: 178mm
- Shipping length: 216mm
- UPC: 011516710567

# Safety Instruction Guide for Lyman Pro Die Packs

## Introduction

Thank you for choosing the Lyman Pro Die Packs for your reloading needs. This guide provides essential safety instructions and information to ensure the safe and effective use of the product. Please read this guide carefully before using the dies.

## General Safety Guidelines

- Product Safety: Ensure safe use of the Lyman Pro Die Packs by following all instructions provided.
- Enhanced Recalls: Stay informed about any product recalls or safety notices. Check regularly for updates.
- Online Shopping: If purchased online, ensure the seller complies with safety regulations.
- Special Consumer Focus: Extra care should be taken when using the product around children or vulnerable individuals.
- EU Contact Point: For inquiries related to safety, refer to the contact information provided by your retailer.
- Rapid Alerts: Monitor the EU's Safety Gate platform for updates on unsafe products.

## Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety glasses and gloves when handling reloading dies.
- Ensure the workspace is clean and free from obstructions to prevent accidents during operation.
- Keep the dies out of reach of children and pets to avoid any potential hazards.
- Do not use the dies for any purpose other than intended reloading applications.
- Inspect dies for any signs of wear or damage before each use. Do not use damaged dies.
- Ensure proper ventilation when reloading to avoid inhalation of any fumes or particles.
- Follow all local laws and regulations regarding reloading and ammunition.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure your reloading press is securely mounted and stable.
- Select the appropriate die for your reloading task (sizing, seating, crimping).
- Refer to the reloading press manual for specific installation instructions.
- Tighten the die securely in the press to prevent movement during operation.

### 2. Usage:

- **Sizing Die:**
  - Insert the brass case into the die and operate the press to resize the case.
  - Check the case for proper sizing before proceeding to the next step.
- **Seating Die:**
  - Place the bullet on the case mouth and insert it into the seating die.
  - Adjust the micrometer to achieve the desired bullet seating depth.
  - Operate the press to seat the bullet firmly in the case.
- **Crimping Die:**
  - After seating the bullet, use the taper crimp die to remove any case mouth flare.
  - Ensure the crimp is sufficient to hold the bullet in place without damaging the case.

## **Disposal Instructions**

- Dispose of any damaged or worn dies in accordance with local regulations.
- Do not throw dies in regular household waste. Check for recycling options available in your area.
- Dispose of any used or spent primers and casings in a safe and environmentallyfriendly manner.

## **Contact Information for Further Support**

For any questions or concerns regarding the Lyman Pro Die Packs, please refer to the contact information provided by your retailer or manufacturer. They will assist you with any safety inquiries or product issues.

Thank you for your attention to these safety guidelines. Enjoy your reloading experience with Lyman Pro Die Packs!
