

ULTIMATE TURRET PRESS KIT 9MM LUGER

ULTIMATE TURRET PRESS KIT The Ultimate Turret press retains the powerful Big Press linkage and circumferential tool head support. Perimeter support sets all Lee turret press apart from others. Through ram primer disposal keeps grit and grime away from the massive steel base and ram. The Ultimate replaces features changeable tool carrier available in three, four, five and six die positions. The tool carrier is precision machined on all surfaces and closely fitted to the steel support ring that surrounds the indexable tool head, having just enough clearance to allow free indexing and enough radial clearance to allow perfect die alignment. Perimeter support eliminates any die tipping and provides the best possible accuracy. Each die position is a quick change, provided by the Lee Breech lock system. Now you can remove your dies and store them in your fitted die box without disturbing the settings. Tool carrier can be quickly changed by removing three alloy steel socket head bolts, wrench included. Every downstroke of the press automatically advances the carrier to the next tool position. The new index mechanism has only one moving part and is overload protected making it nearly indestructible. Should it become damaged the drive clutch can be replaced in seconds without tools. The final and exact positioning of the tool head is provided by a shot pin attached to the ram. The Ultimate now includes a case ejector to whisk away your finished round to the included bin. No adjustments are required, and the ejector is unbreakable. The Big Press all-steel compound toggle linkage found on our 50 BMG reloading press sizes the most difficult cases with ease, with sufficient stroke to load the longest magnum cartridges. Ergonomics are excellent with the formed lever and roller handle. The balanced lever design is easy to operate and will not drop and pinch a finger. The finishing touch, a tool rack surrounding the steel tool carrier holds die wrench, 1/4 hex wrench, alternate primer arm and Safety Prime. **FEATURES:** Five stations allow any brand of die be used -- inline bullet feed dies, powder check dies and such. Simple and reliable automatic indexing -- no tools required and never requires adjustment. Stroke and clearance sufficient for largest magnum rifle cases. Uses the same all steel linkage found on our Classic Cast 50 BMG press. Spent primer tube collects dirty, gritty spent primers. All dies securely fastened in the 5-hole turret with Lee Smart Lock bushings. Safety Prime system - simple, reliable and safe with any brand or size of primer. Cartridge changeover in seconds, including primer size with no adjustments. Automatic case ejector reliably whisks away your completed round to the included ammo bin. Press includes combination tool rack, bin bracket, along with free ammo bin. **SECIFICATIONS:** Maximum cartridge overall length: 3" automatic index | 4" manual index Base material: Steel Columns material: Steel Ram: Steel Ram diameter: Over 1" Linkage: Steel Tool head material: Steel Die size accepted: 7/8" x 14 Number of die mounting holes : 5 Breech Lock Quick Change bushings: Yes, 5 included Priming feature: Yes, no primer brand restrictions Spent primer collection tube: Yes Country of origin: Proudly made in USA

Attributes

- Name: ULTIMATE TURRET PRESS KIT 9MM LUGER

ULTIMATE TURRET PRESS KIT Safety Instructions

Introduction

Thank you for choosing the ULTIMATE TURRET PRESS KIT 9MM LUGER. This product is designed for reloading ammunition safely and efficiently. Please read this safety instruction guide carefully to ensure safe use and compliance with EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always read and understand the product manual before using the ULTIMATE TURRET PRESS KIT.
- Keep the press out of reach of children and vulnerable individuals.
- Inspect the press before each use to ensure it is in good working condition.
- Do not use the press if any parts are damaged or missing.
- Always wear appropriate safety gear, including safety glasses, when reloading.
- Ensure your workspace is clean, dry, and welllit to avoid accidents.
- Follow local laws and regulations regarding ammunition reloading.

Specific Safety Precautions for Use

- **Hazard Identification:**
 - Risk of injury from moving parts during operation.
 - Risk of explosion or fire from improper handling of gunpowder and primers.
 - Risk of eye injury from debris or primer residue.
- **Instructions for Avoiding Hazards:**
 - Always keep hands and clothing away from moving parts.
 - Do not overload the press beyond its specified capacity.
 - Use only the recommended components (dies, primers, and powders) for reloading.
 - Store gunpowder and primers in a cool, dry place away from direct sunlight and heat sources.
 - Never smoke or have open flames near your reloading area.
 - Use the press in a wellventilated area to avoid inhaling fumes.

Instructions for Installation and Usage

- **Installation:**
 1. Choose a sturdy, flat surface to place the press.
 2. Secure the press to the work surface using appropriate fasteners to prevent movement.
 3. Ensure that the tool carrier and all components are properly assembled as per the product manual.
- **Usage:**
 1. Set up the dies according to the instructions provided in the manual.
 2. Insert the appropriate die into the turret and secure it properly.
 3. Adjust the tool carrier for the desired die position.
 4. Load the necessary components (brass, powder, primer) into the press.
 5. Follow the stepbystep reloading process outlined in the manual.
 6. After use, clean the press to remove any debris or residue.

Disposal Instructions

- Dispose of any spent primers and gunpowder residues according to local regulations.
- Do not throw away the press in regular trash. Check with local waste management for proper disposal methods.
- Recycle any metal parts where possible to minimize environmental impact.

Contact Information for Further Support
