

MBUS PRO® HOODED FRONT SIGHT FOR AR-15 - MAGPUL MBUS PRO HOODED FRONT SIGHT FOR AR-15

[Rifle Parts](#) > [Sights](#) > [Front Sights](#)

MAGPUL® PRO HOODED FRONT SIGHT FOR AR-15 The MBUS (Magpul® Back-Up Sight) Pro Sight – Front, Hooded is an all-steel, back up front sight. The hooded front sight arm provides a profile that aids in faster sight acquisition while minimizing snagging. It's also just as durable as Magpul's other Pro sights thanks to a corrosion-resistant QPQ finish that delivers maximum functionality and strength with minimum bulk. When the Hooded Pro Front Sight is paired with the dual aperture, windage-adjustable MBUS Pro Sight – Rear, it can act as a diopter style sight (aperture within an aperture) depending on its placement in relation to the rear sight. Used with the MBUS Pro Sight – Rear, the toolless, elevation-adjustable MBUS Pro Sight set excels in all applications, including when mounted on rail-height gas blocks. Detents keep the Hooded Sight at standard AR sight-height when deployed, and it remains out of the way when it's stowed (measuring 1.71" from the sight base's leading edge to the top of the hood). Two front-post widths (.040" match or standard .060") are available to fit shooters' precision needs (the narrower width front is also compatible with most IR aiming laser and light installations for the professional user). Just like all Magpul's other sights, it's made in the USA. **FEATURES** ALL STEEL CONSTRUCTION Finished with QPQ salt bath nitride for extreme resistance to wear and corrosion 0.432" HEIGHT ABOVE RAIL AT TALLEST POINT AND COVERS LESS THAN 1-3/4" OF RAIL WHEN STOWED STANDARD AR SIGHT HEIGHT WHEN DEPLOYED Positive detents in both the up and down positions as well as on the elevation knob Round hood protects sight post and acts as an 'aperture within an aperture' with a Rear MBUS Pro ELEVATION ADJUSTMENT KNOB Elevation adjustment knob – no tools required Steel, rectangular sight post selectable between Match and Standard widths: 0.04" Match width for increased precision 0.06" Standard width for maximum visibility SPECS Position: Front Height above rail, stowed: ~0.43 in. max Length, stowed: 1.7 in. Weight : 1.5 oz. Compatibility: Mounts on any MIL-STD-1913 Picatinny/STANAG 4694 rail including receiver-height gas blocks ELEVATION ADJUSTMENT ~1 MOA (1.131"/100 m) per click with a 14.5" sight radius ~0.7 MOA (0.820"/100 m) per click with a 20" sight radius

MBUS PRO® HOODED FRONT SIGHT FOR AR15

Safety Instruction Guide

Introduction

Thank you for choosing the MAGPUL® Pro Hooded Front Sight for your AR15. This safety instruction guide is designed to help you understand the safe use, installation, and maintenance of your product in accordance with the EU General Product Safety Regulation (GPSR). Please read this guide carefully to ensure safe operation and compliance.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as a firearm accessory.
- Always handle firearms and accessories with care and in accordance with standard safety practices.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the sight for any signs of wear or damage before each use.
- If you notice any defects or issues, discontinue use immediately and seek assistance.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls and safety updates via the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Always ensure that the firearm is unloaded before installing or adjusting the sight.
- Do not attempt to modify the sight or use it in a manner not specified in the product instructions.
- Avoid using the sight in environments that may expose it to extreme conditions beyond its specifications.
- Use the elevation adjustment knob carefully to prevent overadjustment, which may affect accuracy.
- When stowed, ensure the sight is securely locked to prevent accidental deployment.
- Be aware of your surroundings and ensure a safe shooting environment when using the sight.

Instructions for Installation and Usage

Installation

1. **Prepare the Firearm:** Ensure the firearm is unloaded and pointed in a safe direction.
2. **Select Mounting Location:** Choose a suitable position on the MILSTD1913 Picatinny/STANAG 4694 rail.
3. **Attach the Sight:**
 - Align the sight with the rail.
 - Securely fasten it using the appropriate mounting hardware.
 - Ensure that the sight is at standard AR sight height when deployed.
4. **Check for Stability:** Confirm that the sight is firmly attached and does not move when shaken.

Usage

1. **Deploying the Sight:**
 - Pull the sight up to the deployed position.
 - Ensure positive detents are engaged in both the up and down positions.
2. **Adjusting Elevation:**
 - Use the elevation adjustment knob to set the desired sighting height.
 - Each click adjusts approximately 1 MOA at a 14.5" sight radius.
3. **Sight Alignment:**
 - Align the front sight with the rear sight for accurate targeting.
 - Use the hood as an 'aperture within an aperture' for improved sight acquisition.
4. **Stowing the Sight:**
 - When not in use, push the sight down to stow it securely.

- Ensure it measures 1.71" from the sight base's leading edge to the top of the hood when stowed.

Disposal Instructions

At the end of the product's life cycle, dispose of the sight in accordance with local regulations. Do not dispose of it in regular household waste. Consider recycling options for metal components where available.

Contact Information for Further Support

For any questions or concerns regarding the MBUS Pro Hooded Front Sight, please reach out to the designated EU contact point for safety inquiries. Ensure you have the product details ready for assistance.

By following these guidelines, you can ensure the safe and effective use of your MBUS Pro Hooded Front Sight for AR15. Thank you for your attention to safety and responsible firearm handling.
