

RIFLE PRECISION MICROMETER BULLET SEATING DIES - LEE PRECISION 303 BRITISH RIFLE PRECISION MICROMETER BULLET SEATING DIE

LEE PRECISION RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introducing the new Precision Micrometer bullet seating die. Features dead length bullet seating with smooth, accurate adjustment. Tests prove sliding bullet guide provides cartridges with the least bullet runout. When used as a dead length bullet seating die, the body contacts the shell holder assuring precise uniform seating depth. FEATURES Laser engraved micrometer thimble and body is easy to read with divisions representing one thousandth of an inch, reads just like a precision depth micrometer. Infinitely adjustable, providing precision bullet seating depth. Bullet seating stem is machined and burnished to seat nearly any point style bullet without damage or marking. The case mouth and bullet are held in perfect alignment by a floating bullet guide. The bullet guide is provided with radial clearance to allow the case and bullet guide to align perfectly with the bullet seater screw. The floating bullet guide is reversible, simply unthread guide and re-install to allow seating and crimping simultaneously, an exclusive feature to Lee. This bullet seating die proves accuracy doesn't have to cost a lot.

Safety Instruction Guide for RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introduction

Thank you for choosing the RIFLE PRECISION MICROMETER BULLET SEATING DIES by LEE PRECISION. This guide provides essential safety instructions to ensure that you use this product safely and effectively. Please read this guide carefully before using the product.

General Safety Guidelines

- Always ensure that the product is used in accordance with the manufacturer's instructions.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check the product for any signs of damage or wear. Do not use if damaged.
- Report any unsafe products or incidents to the appropriate authorities.
- Stay informed about product recalls by checking the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that you are wearing appropriate safety gear, such as eye protection, when using the bullet seating die.
- Do not exceed the recommended bullet seating depth as specified by the manufacturer.
- Always ensure that the case mouth and bullet are properly aligned before seating.
- Avoid using the die with damaged or improperly sized cases or bullets.
- Never attempt to modify or alter the bullet seating die.

Instructions for Installation and Usage

1. Installation

- Ensure that your reloading press is securely mounted and stable.
- Clean the bullet seating die and the reloading press before installation.
- Thread the bullet seating die into the press until it is snug, but do not overtighten.
- Adjust the die to the desired seating depth using the micrometer thimble.

2. Usage

- Place the case into the shell holder of the reloading press.
- Insert the bullet into the case mouth, ensuring it is properly seated.
- Lower the ram to bring the bullet seating die into contact with the bullet.
- Pull the handle of the press to seat the bullet to the desired depth.
- Check the seating depth using a caliper to ensure accuracy.
- If necessary, adjust the micrometer thimble for precise bullet seating.

Disposal Instructions

- Dispose of any packaging materials in accordance with local recycling regulations.
- If the product becomes damaged beyond repair, dispose of it responsibly, ensuring it does not pose a risk to the environment or public safety.

Contact Information for Further Support

For any questions or concerns regarding the RIFLE PRECISION MICROMETER BULLET SEATING DIES, please refer to the manufacturer's contact information provided with the product packaging.

By following these safety instructions, you can ensure a safe and effective reloading experience. Thank you for your attention to safety, and happy reloading!
