

LEG STRAP KITS - GBRS GROUP LEG STRAP KIT MULTICAM

GBRS GROUP LEG STRAP KIT Leg straps first saw widespread use with early American open-top, western-style holsters during the late 1800s and continued to gain popularity during the 20th century. These early straps usually took the form of a simple leather or cord tie-down and eventually evolved into the wider webbing type straps popularized by the British SAS holsters developed during the 1970s. The remaining two decades of the twentieth century witnessed marginal improvements and design variations of tactical holsters, as militaries reluctantly abandoned antiqued leather designs. Leg strap conversions for the US military-issued UM-84/M12 holsters appeared sometime during the late 1980's/early 1990s, and the commercial market began to introduce nylon drop leg holsters utilizing two leg straps. During the early years of the GWOT, nearly every drop leg holster on the battlefield featured two leg straps, with many shooters choosing to remove the top strap completely due to chaffing and comfort issues. Today, the majority of America's top shooters choose to run a mid-ride level of drop for their holster, just slightly below the belt line. This has been found to be the ideal location for the pistol to clear body armor and vest-mounted pouches. Although some shooters have turned away from leg straps completely, many still prefer the added stability and reduced movement of their holster by utilizing a leg strap.

The GBRS Leg Strap, along with the GBRS Group Leg Strap Screw Kit (sold separately), attaches directly onto the True North Concepts MHA (and most other drop-down holster adapters) and, for the first time in the history of holsters, allows the shooter to choose the height where the leg strap sits. The GBRS leg strap features a unique design that eliminates the need for an external bracket. The MHA attaches directly to the Tegriss reinforcement, which is seamlessly integrated into the strap's construction. Finally, the shooter can choose the best position for their individual body size and comfort, custom tailoring their setup to their specific needs. Each GBRS Leg strap is made with Tegriss, squadron laminate, adjustable 1" latch ladderloc buckle, 1" triglide, and poly elastic. The minimalistic leg strap provides a generous amount of flexibility, and it is recommended that the user try out several height adjustments to see which is most ideal before securing.

SPECIFICATIONS 6 Layer Tegriss Squadron laminate strap ITW GTSR Latch Ladderloc adjustable buckle 1" ITW Triglidge ITW GTSR Body loop fixed buckle Poly 041 Elastic

COMPATIBILITY True North Concepts MHA and most other drop-down holster adapters It is recommended to use the GBRS Group Leg Strap Screw Kit (sold separately) for mounting.

GBRS Group Leg Strap Kit Safety Instructions

Introduction

Thank you for choosing the GBRS Group Leg Strap Kit. This guide provides essential safety instructions and guidelines to ensure safe and effective use of your product. Please read this document carefully before installation and use.

General Safety Guidelines

- Ensure that the leg strap is compatible with your holster before use.
- Inspect the leg strap regularly for any signs of wear, damage, or malfunction.
- Do not use the leg strap if it shows signs of damage or if the components are missing.
- Keep the leg strap away from extreme temperatures, moisture, and direct sunlight to maintain its integrity.
- Store the leg strap in a cool, dry place when not in use.
- Follow all local laws and regulations regarding the use of tactical holsters and accessories.

Specific Safety Precautions for Use

- Always ensure that the leg strap is securely fastened before use.
- Adjust the leg strap to a comfortable height that allows for full range of motion without compromising stability.
- Be cautious of the strap's positioning to avoid pinching or chafing of the skin.
- When wearing the leg strap, ensure that it does not interfere with your movement or the operation of your holster.
- If you experience discomfort, remove the leg strap immediately and adjust or discontinue use.
- Avoid using the leg strap in situations where it could become entangled or caught.

Instructions for Installation and Usage

1. **Compatibility Check:** Ensure that the GBRS Group Leg Strap Kit is compatible with your True North Concepts MHA or other dropdown holster adapters.
2. **Attachment:**
 - Align the strap with the attachment points on your holster adapter.
 - Insert the strap into the designated slots, ensuring a snug fit.
 - Secure the strap using the adjustable buckle and triglide, ensuring it is tight but not overly restrictive.
3. **Height Adjustment:**
 - Adjust the height of the leg strap to your preference by sliding the strap through the buckle.
 - Test different heights to find the most comfortable position that allows for easy access to your holster.
4. **Final Checks:**
 - Once adjusted, ensure all components are securely fastened.
 - Perform a mobility check to ensure that the leg strap does not impede your movement.
5. **Maintenance:**
 - Regularly check the integrity of the strap and its components.
 - Clean the strap with a damp cloth as needed, avoiding harsh chemicals.

Disposal Instructions

- Dispose of the leg strap responsibly according to local regulations.
- If the leg strap is damaged beyond repair, consider recycling the materials where possible.
- Do not dispose of the leg strap in regular household waste if it contains nonbiodegradable components.

Contact Information for Further Support

For any safety inquiries, concerns, or support regarding the GBRS Group Leg Strap Kit, please contact the manufacturer or authorized dealer. Ensure that you have your product details ready for reference.

Thank you for your attention to these safety instructions. Your safety is our priority, and we hope you enjoy using your GBRS Group Leg Strap Kit.
