

LEG STRAP KITS - GBRS GROUP LEG STRAP KIT BLACK

GBRS GROUP LEG STRAP KIT Leg straps first saw widespread use with early American open-top, western-style holsters during the late 1800s and continued to gain popularity during the 20th century. These early straps usually took the form of a simple leather or cord tie-down and eventually evolved into the wider webbing type straps popularized by the British SAS holsters developed during the 1970s. The remaining two decades of the twentieth century witnessed marginal improvements and design variations of tactical holsters, as militaries reluctantly abandoned antiqued leather designs. Leg strap conversions for the US military-issued UM-84/M12 holsters appeared sometime during the late 1980's/early 1990s, and the commercial market began to introduce nylon drop leg holsters utilizing two leg straps. During the early years of the GWOT, nearly every drop leg holster on the battlefield featured two leg straps, with many shooters choosing to remove the top strap completely due to chaffing and comfort issues. Today, the majority of America's top shooters choose to run a mid-ride level of drop for their holster, just slightly below the belt line. This has been found to be the ideal location for the pistol to clear body armor and vest-mounted pouches. Although some shooters have turned away from leg straps completely, many still prefer the added stability and reduced movement of their holster by utilizing a leg strap.

The GBRS Leg Strap, along with the GBRS Group Leg Strap Screw Kit (sold separately), attaches directly onto the True North Concepts MHA (and most other drop-down holster adapters) and, for the first time in the history of holsters, allows the shooter to choose the height where the leg strap sits. The GBRS leg strap features a unique design that eliminates the need for an external bracket. The MHA attaches directly to the Tegriss reinforcement, which is seamlessly integrated into the strap's construction. Finally, the shooter can choose the best position for their individual body size and comfort, custom tailoring their setup to their specific needs. Each GBRS Leg strap is made with Tegriss, squadron laminate, adjustable 1" latch ladderloc buckle, 1" triglide, and poly elastic. The minimalistic leg strap provides a generous amount of flexibility, and it is recommended that the user try out several height adjustments to see which is most ideal before securing.

SPECIFICATIONS 6 Layer Tegriss Squadron laminate strap ITW GTSR Latch Ladderloc adjustable buckle 1" ITW Triglide ITW GTSR Body loop fixed buckle Poly 041 Elastic

COMPATIBILITY True North Concepts MHA and most other drop-down holster adapters It is recommended to use the GBRS Group Leg Strap Screw Kit (sold separately) for mounting.

Safety Instruction Guide for GBRS Group Leg Strap Kit

Introduction

Thank you for choosing the GBRS Group Leg Strap Kit. This guide provides important safety instructions and user information to ensure the safe and effective use of your leg strap kit. Please read this guide carefully before using the product.

General Safety Guidelines

- **Product Safety:** This product is designed for safe use in accordance with EU regulations. Always follow the instructions to minimize risks.
- **Enhanced Recalls:** Stay informed about product recalls. In case of a recall, you will be provided with free remedies for any dangerous products.
- **Online Shopping:** When purchasing online, ensure that the seller complies with all safety requirements as if you were buying in a physical store.
- **Special Consumer Focus:** Extra precautions are in place for vulnerable groups. Ensure that children do not use this product without adult supervision.
- **EU Contact Point:** For any safety inquiries, please refer to the designated EU contact point.
- **Rapid Alerts:** Be aware of the Safety Gate system for timely updates on any unsafe products.

Specific Safety Precautions for Use

- **Age Restrictions:** This product is not intended for use by children under 18 years of age. Adult supervision is recommended.
- **Proper Fit:** Ensure the leg strap fits securely and comfortably around your leg. An improper fit may lead to discomfort or injury.
- **Avoid Overloading:** Do not exceed the recommended weight capacity of the strap. Overloading may compromise safety and functionality.
- **Inspect Before Use:** Always inspect the leg strap for any signs of wear or damage before each use. Do not use if any damage is found.
- **Avoid Sharp Objects:** Keep the leg strap away from sharp objects that may cause cuts or damage to the material.
- **Regular Maintenance:** Clean and maintain the strap regularly to ensure longevity and safe use.

Instructions for Installation and Usage

1. **Unpacking:** Carefully remove the leg strap kit from its packaging. Ensure all components are included.
2. **Attachment:**
 - Attach the leg strap to the True North Concepts MHA or compatible dropdown holster adapter.
 - Ensure that the strap is securely fastened according to the manufacturer's instructions.
3. **Adjusting the Fit:**
 - Adjust the height of the strap to your preference. The GBRS leg strap allows for customizable height settings.
 - Use the adjustable 1" latch ladderloc buckle to secure the strap comfortably around your leg.
4. **Testing the Fit:**
 - Stand up and walk around to test the comfort and fit of the strap.
 - Make any necessary adjustments to ensure stability and comfort.
5. **Removing the Strap:** To remove the strap, carefully unfasten the latch ladderloc buckle and detach it from the holster adapter.

Disposal Instructions

- **Environmentally Friendly Disposal:** Dispose of the leg strap kit in accordance with local regulations. Consider recycling materials where possible.
- **Do Not Dispose in Household Waste:** Avoid throwing the leg strap in regular household waste. Check for local recycling programs or hazardous waste disposal options.
