

STAINLESS STEEL PIN MAGNET - LYMAN STAINLESS STEEL PIN MAGNET

[Reloading](#) > [Case Cleaning](#) > [Case Tumblers & Accessories](#)

An Easy Tool for Separating Your Stainless-Steel Tumbler Pins

One of the best ways to clean off fouling, dirt and other residue off your fired cases is to run them inside a case tumbler with stainless-steel pins and some cleaning solution. However, separating the pins from your cases is another job entirely. Lyman makes it easier with the company's Stainless Steel Pin Transfer Magnet. All reloaders have to do to separate pins from fired cases is simply run the magazine over the cases, and all the pins will be pulled away from the cases and grabbed by the magnet. Pins can be released easily by simply pulling up on the magnet's handle. This product pairs perfectly with Lyman's Cyclone Rotary Tumbler, as well as other case tumblers on the market.

Safety Instruction Guide for Lyman Stainless Steel Pin Magnet

Introduction

Thank you for choosing the Lyman Stainless Steel Pin Magnet. This guide provides essential safety information and instructions to ensure safe and effective use of the product. Please read this guide carefully before using the product.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is to separate stainless steel pins from fired cases.
- Keep the product out of reach of children and vulnerable individuals to prevent accidental injury.
- Regularly inspect the product for any signs of damage or wear. Do not use if damaged.
- Follow all instructions to avoid potential hazards associated with improper use.

Specific Safety Precautions for Use

- Always use the magnet in a welllit area to ensure visibility of the pins and cases.
- Avoid using the magnet near electronic devices or sensitive equipment, as strong magnets can interfere with their operation.
- Do not attempt to modify the magnet or its components in any way, as this may compromise safety.
- If the magnet becomes stuck to a metal surface, do not forcefully pull it away; instead, gently maneuver it to release it.
- Be cautious of pin sharpness; while they are designed for cleaning, they can be sharp and may cause injury if handled improperly.

Instructions for Installation and Usage

1. Preparation:

- Ensure that your fired cases have been tumbled with stainless steel pins and are ready for separation.
- Set up your workspace with adequate lighting and a flat surface.

2. Using the Magnet:

- Hold the magnet by its handle.
- Position the magnet over the fired cases with the stainless steel pins.
- Slowly move the magnet over the cases. The pins will be attracted to the magnet and will separate from the cases.
- Once all pins are collected, lift the magnet away from the cases.

3. Releasing the Pins:

- To release the pins, simply pull up on the magnet's handle. The pins will drop away from the magnet.
- Ensure that you are releasing the pins into a safe area where they will not pose a hazard.

Disposal Instructions

- When the product reaches the end of its life or is no longer usable, dispose of it according to local regulations for metal recycling.
- Ensure that any remaining pins are disposed of safely to prevent injury.

Contact Information for Further Support

For any questions or concerns regarding the Lyman Stainless Steel Pin Magnet, please refer to the official Lyman website or contact your local retailer for assistance.

By following these safety instructions, you can ensure a safe and effective experience with your Lyman Stainless Steel Pin Magnet. Thank you for your attention to safety!
