Instructions for Installation and Usage

Installation

1. **Preparation:** Ensure that your Dillon press is turned off and unplugged before beginning installation.
2. **Remove Existing Components:** Carefully remove the existing shellplate and any associated components from the press.
3. **Install the Bearing Kit:**
 - Place the highprecision needle roller bearing in the designated location.
 - Position the optimized spacers as per the installation guide.
 - Secure the customengineered lock ring in place.
4. **Reattach the Shellplate:** Align the shellplate with the newly installed components and secure it firmly.
5. **Check for Proper Installation:** Rotate the shellplate manually to ensure smooth operation without friction.

Usage

1. **Power On:** Once installation is complete, plug in the press and turn it on.
2. **Load Components:** Follow your usual reloading procedures to load cases and powder.
3. **Monitor Operation:** Observe the shellplate rotation during operation. If you notice any irregularities, stop immediately and inspect for issues.
4. **Maintain Cleanliness:** Keep the area around the press clean and free of debris to ensure safe operation.

Disposal Instructions

- Dispose of the product in accordance with local regulations and guidelines.
