

Small Pin for Armanov Swage PRO | Dillon XL650 / XL750 - Milled Aluminium Station One Locator for Dillon XL650/XL750 (#4 - 13340)

Eliminate the weak link in your progressive reloading cycle. Station One dictates the alignment of your entire progressive run, yet factory components often flex under heavy use, leading to tilted cases and jammed indexing. The Armanov Station One Locator # is precision CNC-machined from premium high-grade aluminium, delivering industrial rigidity to ensure every cartridge enters the cycle with absolute geometric perfection.

Safety Instruction Guide for Small Pin for Armanov Swage PRO | Dillon XL650 / XL750

Introduction

Thank you for choosing the Small Pin for Armanov Swage PRO, designed specifically for Dillon XL650 and XL750 reloading systems. This guide provides essential safety instructions and usage guidelines to ensure your safety and the effective operation of your reloading equipment.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as specified in this manual.
- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when operating reloading equipment.
- Keep the product and all components out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of wear or damage before use.
- Follow all local laws and regulations regarding the use and storage of reloading components.
- If you encounter any issues or accidents, report them to the relevant authorities.

Specific Safety Precautions for Use

- **Avoid Overloading:** Do not exceed the manufacturer's recommended specifications for reloading components.
- **Proper Alignment:** Ensure that the Station One Locator is correctly installed to avoid misalignment that can lead to jams or misfires.
- **Secure Workspace:** Work in a clean, dry, and welllit area to minimize distractions and hazards.
- **Use Compatible Components:** Only use this product with Dillon XL650 and XL750 systems to ensure compatibility and safety.
- **Training:** Ensure that all users are trained in safe reloading practices and familiar with the operation of the Dillon reloading systems.

Instructions for Installation and Usage

1. Installation of the Small Pin:

- Ensure that the reloading machine is turned off and unplugged.
- Remove any existing components from the Station One area.
- Align the Small Pin with the designated hole in the Station One Locator.
- Secure the Small Pin in place using the manufacturer's recommended fastening method.
- Doublecheck the alignment before proceeding to use the reloading machine.

2. Using the Dillon XL650 / XL750 with the Small Pin:

- Load the reloading machine according to the manufacturer's instructions.
- Begin the reloading process, ensuring that all components are functioning correctly.
- Monitor the operation closely for any signs of misalignment or jamming.
- If any issues arise, stop the machine immediately and address the problem before continuing.

Disposal Instructions

- Dispose of the Small Pin and any other reloading components in accordance with local regulations.
- Do not dispose of any reloading materials in regular household waste.
- Consider recycling options for metal components where applicable.

Contact Information for Further Support

For any inquiries regarding safety or product information, please contact the manufacturer directly through their official channels. They will provide the necessary assistance and information regarding the product.

By following these safety instructions, you can ensure a safe and efficient reloading experience with the Small Pin for Armanov Swage PRO. Always prioritize safety and remain informed about best practices in reloading.
